Our solutions for Labels

These products will support our sustainable path if we use it in the right application

● **Facestock:** Dedicated facestocks

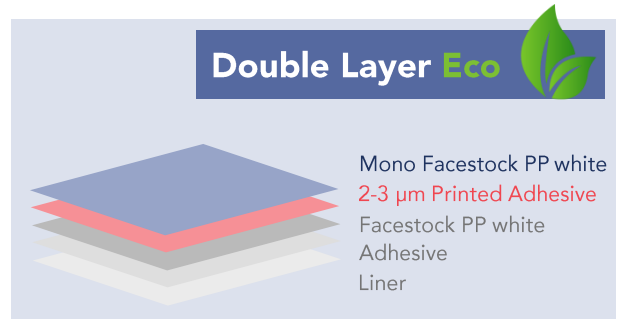

● **Adhesive:** Customized coating of specific detachable acrylic adhesives

● **Liner:** 23-30 μ PET
Benefit: Improved labelling performance

PSL 4.0

Detach adhesive (PSL 4.0, Cleanflake)

- For applications on PET-containers
- Full recyclability through NAOH solvent adhesive & floating foil
- With PSL 4.0: Encapsulated printing to avoid color bleeding possible
- PSL 4.0 for HDPE-containers under development

Double Layer Eco

Mono Facestock PP white
2-3 μ m Printed Adhesive
Facestock PP white
Adhesive
Liner

Less is More

- Minimize material consumption: less material = less waste
- PE85 -> PE65 / PP60 -> PP50/40
- Thinner liner material (e.g. PET23)
- All4Labels Double Layer Eco (mono material for upper layer -> save 50% liner!)

RafCycle
cycle4green

Liner Recycling

- rPET & Paper liner with recycled content available (up to 90% recycling content)
- Collect Paper or PET liner at your factories and enable it's recycling
- We bring you in contact with the right people

BIO-BASED
NATURAL & ORGANIC MULTI-SURFACE CLEANER
Tropical Fresh

Strawberry
100% NATURAL JAM

Recyclable Bio-based Materials*

- According to Avery Dennison recyclable within standard recycling processes
- Bio-PE (Ethanol from the sugarcane industry instead of petroleum)
- MarbleBase with 80% Calciumcarbonat from marble quarry and 20% rHDPE

* Provided that only waste products were used for production
